

## **Drinking Water Revolving Fund 2017 Intended Use Plan**

### **I. Introduction**

The federal Safe Drinking Water Act Amendments of 1996 authorized the Drinking Water State Revolving Fund program to provide funds to states to finance drinking water projects and activities to protect public health and achieve or maintain compliance with the Safe Drinking Water Act. The Act authorizes the U.S. Environmental Protection Agency to award annual capitalization grants to each state to capitalize a state revolving fund, which the state can use to provide loans and other assistance to public water systems. Each state must provide a state match of at least 20% to receive the federal funds. As part of its capitalization grant application, each state must annually prepare an Intended Use Plan (IUP), which describes the intended uses of available funds.

The Minnesota Legislature established the Drinking Water Revolving Fund (DWRF) under Minnesota Statutes Section 446A.081 to receive federal capitalization grants and state matching funds. The Minnesota Public Facilities Authority (PFA) is responsible for managing the Fund and its assets. The PFA is authorized to prepare the annual IUP based on the Project Priority List prepared by the Minnesota Department of Health (MDH). The PFA is also responsible for the financial administration of the DWRF program, through which the PFA purchases the general obligation bonds of local governments to finance eligible projects, transactions which are commonly referred to as loans. The PFA's responsibilities include reviewing financing applications, setting the financing rates, terms and conditions, and selling revenue bonds to leverage additional funds. In addition to preparing the Project Priority List, the MDH is responsible for reviewing projects to ensure they meet technical and environmental requirements and administering various set-aside activities authorized under the Act.

The 2017 IUP identifies projects and activities the PFA intends to fund from the DWRF in state fiscal year (FY) 2017 (July 1, 2016 to June 30, 2017). To fund these projects and activities, the PFA will use a combination of funds from the 2016 federal capitalization grant, loan repayments and PFA revenue bond proceeds.

At this time the Minnesota Legislature has not appropriated the required state matching funds for the 2017 federal capitalization grant. The 2017 DRAFT IUP is based on the assumption that the PFA will not receive state matching funds or a federal capitalization grant in FY 2017.

## **II. Project Funding**

### *A. Project Priority List*

The Project Priority List (PPL) prepared by the MDH identifies drinking water projects potentially eligible to receive a DWRF loan over the next five years. Projects are listed in priority order based on a point system established by the MDH in Minnesota Rules parts 4720.9010 to 4720.9040. The 2017 PPL contains 331 projects with a total estimated cost of \$560 million and is attached as an appendix to this IUP.

### *B. Placement on the IUP*

The Intended Use Plan (IUP) identifies projects on the PPL that are eligible to apply for and receive DWRF loans in FY 2017. The IUP is prepared by the PFA in accordance with Minnesota Statutes Section 446A.081, Subdivision 5 and Minnesota Rules Part 7380.0255. For a project to be placed on the IUP, the PFA must receive a written request signed by an official of the municipality (city, township, county, or water district) or other public water system entity that will be the borrower for the loan. The request must include a schedule indicating that the applicant expects the project to receive all necessary approvals and proceed to the point of receiving a DWRF loan within approximately one year from the approval of the 2017 IUP.

Eligibility for placement on the IUP does not guarantee a project will receive a DWRF loan. Minnesota has significant drinking water infrastructure needs and the PFA must balance loan demand and lending capacity by setting a fundable range for projects on the current IUP in order to also preserve lending capacity for future needs. A municipality with a project in the IUP fundable range must complete the loan application process with the PFA and receive project certification from the MDH under the provisions of Minnesota Rules Part 4720.9060 before a DWRF loan can be approved.

An approved IUP remains effective until the following year's IUP is approved. A project listed in the IUP fundable range that does not receive a loan but submits a loan application to the PFA and is certified by the MDH by June 30, 2017 will be carried over in the fundable range on the next IUP.

### *C. Draft IUP and Public Comment*

In January 2016, a notice was sent to all public water systems in the State with information about the DWRF program, including instructions on how to request placement on the PPL and IUP. Based on the requests received, a draft 2017 IUP was presented to the PFA Board on August 26, 2016. The PFA Board approved the fundable range for the 2017 IUP (see paragraph D below) and authorized the draft IUP to be made available for public comment. Public comments on the draft 2017 IUP will be accepted through September 23, 2016. Following a review of comments received and any appropriate changes, the PFA expects to approve the 2017 IUP on or about September 30, 2016.

#### *D. IUP Project List*

The 2017 IUP project list is shown as Table 1 on pages 10-14 and is divided into two parts.

Part A lists 36 carryover projects totaling \$84 million in requested DWRf financing. The Part A projects were previously listed in fundable range on the 2016 IUP fundable range and qualify as carryover projects on the 2017 IUP because they submitted loan applications to the PFA and were certified for funding by the MDH by June 30, 2016. These projects are eligible to receive DWRf loans in FY 2017 and the PFA will award funding when each project completes the application and bidding process.

Part B lists 105 new 2017 IUP project requests totaling \$199 million in requested financing. Due to the lack of a state appropriation for state matching funds and the resulting uncertainty regarding future state and federal support for the DWRf, the PFA is not able to establish a fundable range for new project requests at this time. If the required state matching funds are appropriated in the future, the 2017 IUP may be amended as described below.

#### *E. Possible IUP Amendment*

If the PFA receives an appropriation for state matching funds in FY 2017, the PFA may amend the 2017 IUP to establish a fundable range for new projects based on the IUP requests identified in Table 1, Part B and potential additional projects on the 2017 PPL that meet the requirements below. To be considered for an IUP amendment, a project must have secured all other necessary funding and show that it will be ready to proceed with construction before the 2018 IUP is expected to be approved. Applicants that would like their projects to be considered for an IUP amendment are advised to keep their PFA loan officer informed of the status of their project.

#### *F. Loan Application Requirements and Deadlines*

All carryover projects in Part A have met the loan application submittal deadlines and have submitted plans and specifications to the MDH. If an IUP amendment is approved in the future, new projects in the fundable range will have six months from the amendment approval date to submit a loan application to the PFA and plans and specifications to the MDH.

#### *G. Loan Terms and Conditions*

Terms and conditions for DWRf loans are determined pursuant to Minnesota Statutes Section 446A.081 and Minnesota Rules Part 7380.0265. Construction loans are not awarded until as-bid construction costs are submitted to the PFA. Interest rates are set at the time a loan is made according to Minnesota Rules Part 7380.0272. Interest rates are based on the greater of the current bond market rates for tax-exempt municipal bonds as determined by a daily index, or the bond yield scale of the PFA's bonds, if PFA bond proceeds are available. For loan awards made after the 2017 IUP is approved, the PFA has set a base discount of 1.5% that will be applied to the appropriate bond yield scale for loans up to \$20 million. The base discount for loans over \$20 million will be reduced by 1.25 basis points (.0125%) for each \$1 million over \$20 million.

Additional discounts up to 2.5% may be applied to borrowers under 2,500 population as described in Minnesota Rules Part 7380.0272, Subpart 3B. The minimum interest rate under PFA rules is 1 percent.

#### *H. Principal Forgiveness*

The PFA received the 2016 federal drinking water capitalization grant in June 2016. The 2016 federal grant is \$14,875,000 and requires that a portion of the funds, up to 20% (\$2,975,000), be used to provide additional subsidization to eligible projects. The PFA will provide additional subsidization to eligible projects in the form of principal forgiveness grants, meaning a specific dollar reduction in the amount of loan principal that must be repaid, which is granted at the time a DWRF financing agreement is awarded. Minnesota Statutes, Section 446A.081, Subdivision 9 authorizes the PFA to provide principal forgiveness to the extent permitted under federal law.

Principal forgiveness funds will be used to address affordability needs based on criteria specified in Minnesota Statutes, Section 446A.081, Subdivision 9 (b), which states that principal forgiveness may be provided for projects to address financial needs where the average annual residential drinking water system cost would otherwise exceed 1.2 percent of the median household income (MHI) of the project service area. The amount of principal forgiveness is limited to 80 percent of the system costs over 1.2% of MHI, to a maximum of 4,000,000 or \$15,000 per connection, whichever is less, and not to exceed 80 percent of the total project cost.

The PFA intends to use the \$2.9 million available from the 2016 federal grant along with remaining funds available from the 2015 federal grant (\$1,866,389) to provide principal forgiveness grants to address affordability needs for eligible carryover projects from the 2016 IUP as show below.

#### **Principal Forgiveness Grants for Projects on the 2017 IUP**

2017 PPL			Total DWRF Project	DWRF Principal Forgiveness	DWRF Loan
Rank	Borrower	Project			
7	Lowry	Treatment - New Plant - Remove As	\$ 1,802,799	\$ 563,760	\$ 1,239,039
57	Breckenridge	Treatment - New Lime Softening Plant	\$ 13,584,000	\$ 4,000,000	\$ 9,584,000
92	Blackduck	Watermain - Repl Summit Ave & Main St. N	\$ 746,463	\$ 270,000	\$ 476,463
Total			\$ 16,133,262	\$ 4,833,760	\$ 11,299,502

### **III. Summary of FY 2016 Project Activity**

A total of 27 municipal drinking water projects on the 2016 PPL totaling \$49.6 million were funded in FY 2016 through the coordinated efforts of the PFA, USDA Rural Development, Iron Range Resources Rehabilitation Board, MN Business Development Public Infrastructure Program, MDH Clean Water Legacy and the Small Cities Development Program.

## Drinking Water Projects Funded In FY 2016

DWSRF = Drinking Water Revolving Fund loan (PFA)

DWSRF PF = Drinking Water Revolving Fund Principal Forgiveness (PFA)

IRRRB = Iron Range Resources Rehabilitation Board

MDH CWL = MN Dept of Health Clean Water Legacy Well Sealing Grant

RD = USDA Rural Development

#### IV. Financial Status of the DWRF

Table 2 (page 15) shows the sources and uses of funds in the DWRF for FY 2016, the total amounts from FY 1998 through FY 2016, and the estimated amounts for FY 2017.

The PFA has developed a financial model to estimate the average annual lending capacity of the DWRF based on the current assets in the Fund and reasonably expected future federal and state funds. Based on that model, the PFA currently estimates the average DWRF lending capacity to be approximately \$39 million per year in perpetuity, assuming no new state or federal funds are received. In most years, the PFA has used its reserves and bonding authority to make loans at higher levels based on strong demand.

Given the uncertainty of future state and federal support, at this time the 2017 IUP fundable range only includes the 36 carryover projects totaling \$84 million in Part A of Table 1. The PFA will fund these carryover projects when they are ready to proceed. While the amount is higher than the

sustainable lending capacity of the Fund, it is within a manageable level that the Fund can support in the short term. In the long term however, without continued federal and state support for the program, funding projects beyond the Fund's average lending capacity will decrease its future lending capacity.

## V. Set-Asides

In addition to financing drinking water projects, the federal Safe Drinking Water Act permits states to set-aside a percentage of capitalization grant funds for certain non-project activities, up to a maximum of 31%. States that take less than the maximum allowed amounts may choose to "bank" some set-asides to potentially take later from future capitalization grants, thereby maximizing the federal funds used for project loans in the short-term while preserving the ability to take a higher level of set-asides from future grants for needed set-aside activities.

The MDH has requested that the PFA reserve 22% of the 2017 capitalization grant for set-aside activities. MDH has also requested \$2,000,000 of banked set-aside funds to increase funding available for Public Water Supply Supervision (PWSS) for community field staff. The table below shows the set-aside percentages to be reserved from the 2017 federal grant and the amounts previously banked.

Congress has not yet appropriated funds for 2017 capitalization grants and the Minnesota Legislature has not appropriated the required state match. The percentages noted below identify what will be taken from the 2017 capitalization grant when available.

DWRF Set-Asides					
Set-Aside	Amounts	Planned 2017 Set-Aside From	Balance of Banked Set-Asides	Maximum	Planned Set-Aside
	Previously Banked From Prior Cap Grants			Percentage Allowed From Each Grant	
DWRF Program Administration	\$ 1,049,260	-	1,049,260	4%	0%
Technical Assistance to Small Systems	\$ 424,630	-	424,630	2%	2%
Public Water Supply Supervision (PWSS)	\$ 2,959,005	2,000,000	959,005	up to 10%	10%
Capacity Development	\$ -	-	-	10%	0%
Water Operator Certification	\$ 287,515	-	287,515	categories	0%
Wellhead Protection	\$ -	-	-	15%	10%
	\$ 4,720,410	2,000,000	2,720,410	31%	22%

## VI. Environmental and Public Health Benefits

At a minimum, the PFA expects to achieve the following outputs and outcomes through the projects described in the 2017 Intended Use Plan.

1. **Output:** The PFA expects to fund approximately 7 projects to construct or rehabilitate drinking water treatment facilities. The total amount of the DWRF financing is expected to be approximately \$44.6 million.

**Outcome:** These projects will result in better drinking water for the residents of these

communities and, upon completion of the projects, facilities that meet all applicable permits and SDWA requirements.

2. **Output:** The PFA expects to fund approximately 4 projects to construct new or replace drinking water wells. The total amount of the DWRf financing is expected to be approximately \$1.6 million.

**Outcome:** These projects will result in better and more reliable drinking water for the residents of these communities and, upon completion of the projects, facilities that meet all applicable permits and SDWA requirements.

3. **Output:** The PFA expects to fund approximately 17 projects to construct or rehabilitate drinking water transmission and distribution systems. The total amount of the DWRf financing is expected to be approximately \$14.3 million.

**Outcome:** These projects will result in better and more reliable drinking water for the residents of these communities.

4. **Output:** The PFA expects to fund approximately 5 projects to construct or rehabilitate drinking water storage facilities. The total amount of the DWRf financing is expected to be approximately \$6.6 million.

**Outcome:** These projects will result in more reliable drinking water for the residents of these communities.

5. **Output:** The PFA expects to fund approximately 3 project to install water meters or other water sustainability improvements. The total amount of these DWRf financing is expected to be approximately \$16.54 million.

**Outcome:** These projects will help limit water loss and improve water conservation in these communities.

## VII. Drinking Water Revolving Fund Goals

The primary objective of the DWRf is to provide loans to public water suppliers. The descending order of loan priority is to: 1) resolve infrastructure problems that pose the most serious risk to public health, 2) bring systems into compliance with drinking water requirements, and 3) assist systems in most financial need. A lower program priority is to provide suppliers with proactive assistance and support so they can operate their systems more effectively and appropriately. This assistance is accomplished through the set-aside activities of operator certification, technical assistance to small systems, capacity development, and wellhead protection. The lowest program priority is to provide loan assistance to maintain systems in a sound condition and in compliance with public water supply standards.

### *Program Goals:*

A. Provide financial and other assistance (including the set-aside activities) to public water supply systems in order to protect the public health and achieve and maintain compliance with the Safe Drinking Water Act, while following sound lending practices.

B. Leverage the capitalization grants as appropriate in order to finance as many projects as possible while maintaining sufficient cash flows to meet future project financing needs.

C. Manage the assets of the Fund in perpetuity so that it is a permanent resource to assist public water systems in the State.

*Set-Aside Goals:*

D. Public Water System Program Administration. Maintain an up-to-date, statewide public water system program that consists of providing technical expertise, establishing standards, monitoring, education, enforcement, and public information.

E. Technical Assistance to Small Systems. Provide personal, non-regulatory technical assistance to water supply operators so they can effectively manage the complexities of the systems they operate, and for operators whose systems utilize groundwater, to also identify and manage potential sources of contamination.

F. Wellhead Protection. To implement Minnesota's EPA approved wellhead protection program in order to effectively manage potential contaminant sources in the areas that contribute water to wells.

## **VIII. Cross-Collateralization**

As permitted by Congress in legislation approved in 1997, the PFA has cross-collateralized the bonds sold for the DWRF and the Clean Water Revolving Fund. The purpose is to enhance the security of bonds sold for both programs, thereby improving the credit rating and reducing the interest rate on the bonds. This will allow the PFA to pass on the best possible interest rates to its borrowers. The revenues from loan repayments in each program are pledged to the bonds for that program and remain in each respective bond fund to the extent required in the bond indenture. After the revenues in each program have been used to make the PFA's debt service payments on the bonds and meet all other payment and coverage requirements under the bond indenture, funds in excess of these requirements may be held as surplus funds. These surplus funds from one program can then be used to cover a default in the other program.

Given the coverage requirements the PFA must meet for its bonds, the general obligation pledges provided by the borrowers, and the financial management practices of the PFA (as reflected by the AAA rating of its bonds), it is very unlikely that a default would occur. The cross-collateralization of the two programs will, however, provide even more assurance to the bondholders and enhance the financial strength of the programs.

Notes:

- (1) The federal capitalization grant shown in FY 2016 includes the 2016 grant which was received in June 2016. Congress has not yet appropriated funds for 2017.
- (2) State funds in excess of the required match to the cumulative federal grants have already been deposited to the DWRF and expended, or encumbered for eligible projects. The 2016 federal grant funds will be obligated for multiple projects and the State will draw 100% of those funds as eligible costs are incurred for those projects.
- (3) Revenue Bond Proceeds (net), and Bond Debt Service are net of potential refunding activity and debt service reflects the DWRF advance to DWRF Sep 2015 for bond calls.
- (4) Binding commitments are recorded when both the PFA and the recipient have signed a project assistance agreement, which is processed after a project has been certified by the MDH and as-bid costs are submitted to the PFA. Actual FY 2016 binding commitments were \$44,803,168. The amount shown is the net amount which includes decreases to prior years' binding commitments and increases to two projects funded prior to FY2016.
- (5) Additional subsidization provided in the form of principal forgiveness to eligible projects as authorized under federal law and MN Statutes 446A.081, Subdivision 9.
- (6) The FY16 set-aside amounts are based on the following percentages taken from the 2016 federal grant: PWSS - 10%, TA - 2%, Wellhead - 10%.
